USB Drive Digital Message System

USB Drive, Thumb Drive, U Drive, Pen Drive, whatever you call the drive, it is becoming the standard for moving digital files. Prodigital recognized this fact and created the first USB Drive compatible digital On-Hold System.

Moving message files to the USB60 is quick and simple for the dealer and customer. Insert the USB Drive into the USB port of your PC or Mac and the computer will recognize it as a removable drive. Drag and drop the message file, or files, into the USB Drive. Remove the USB Drive from the computer and insert it into the USB60. This system does not require external computer hardware and is perfect for e-mailing messages to your customers.

Setup for the USB60 is easy. Insert the USB Drive and the USB60 plays the file or multiple files automatically. After loading, the system starts playback with the factory presets. You can use the Front Panel Digital Controls to adjust the volume, contour the sound with the two band equalizer and step through the loaded files to select an individual message to play. System settings and levels will be displayed on the USB60's LCD panel as you adjust them. When finished customizing the system, the LCD displays the current message playing.

Mounting the USB60 is easy with the included wall mounting bracket. Attach the bracket to the wall, plug in the cables and slide the system into place. This unique mounting bracket gives the system the smallest footprint possible. The USB60 requires a mounting space of only 2 3/4" X 6 1/2".

- Message Loading - Standard USB Drive
- Digital Controls - Volume, 2 Band Eq, Message Select
- Memory - 60 min. @ 32Kbps With 16 MB USB Drive
- Compatible With 8MB To 512MB USB Drives
- Visual Interface - LCD Display
- Forward Facing Controls
- Metal Enclosure
- Bit Rate - 8kbps to 128Kbps
- Easy To Use Wall Mounting Bracket
